Customers stay in chat

What it does for customers

- ✓ Answers hours, prices, products & FAQ instantly
- ✓ Recommends the right product (guided picker)
- ✓ Generates formal quotes with shareable links
- ✓ Books shop visits & captures delivery details
- ✓ Explains payment (GCash, bank) & delivery options
- ✓ Connects to a real person when they ask

What it does for your team

- ✓ Email alerts when someone needs a human
- ✓ Admin dashboard — leads, orders, quotes, inventory
- ✓ Edit knowledge in Google Docs (no coder needed)
- ✓ Toggle out-of-stock from a Google Sheet
- ✓ Pause bot when you reply; resume with one tap
- ✓ Works on Facebook Messenger & Instagram DMs

How it works (simple)

1. **Customer DMs your Page** — same Messenger/Instagram they already use
2. **Bot searches your Google Doc** for facts + applies your business rules
3. **OpenAI writes a friendly reply** — grounded in your content, not guesses
4. **Important inquiries saved** to Google Sheets; team emailed when needed
5. **You take over in Business Suite** when the conversation needs a human touch

Real example: Beantol Coffee

A Cebu roastery serving 30+ cafés uses this bot to handle pricing, bean recommendations, Maxim delivery (Cebu metro), J&T shipping (province/nationwide), wholesale MOQ rules, and appointment booking — while staff focus on high-value chats.

Perfect for shops that...

- ✓ Get the same questions every day in DMs
- ✓ Sell products with sizes, variants, or delivery zones
- ✓ Want leads captured, not lost in inbox scroll
- ✓ Need after-hours coverage without extra staff

What you need to build one

- ✓ Facebook Page (+ optional Instagram)
- ✓ Meta Developer app & webhook
- ✓ OpenAI API account
- ✓ Cloud host (e.g. Render)
- ✓ Google Doc + Sheets (team-friendly)
- ✓ Custom dev for your products & rules

Want this for your shop?

Start with a Messenger bot — same architecture adapts to bakeries, boutiques, clinics, salons & more.
